

Client Team,

Attached are selected enterprise and business unit reports from your storage reporting for the week ending 06/11/2022. There is a slightly increased workload on VSIPUREFLASH32 and VSIPUREFLASH17 from the Foxe4 jb92bs* hosts this week. This contributed to total enterprise IOPS hitting an all-time high 295,000 IOPS on Monday, with excellent storage performance across the board. Slow and steady growth continues on Isilons this week, except VSIIILON01 where used storage decreased by 44 TiB. We continue to see significant increases in used storage on cohesityvsi01 (+143 TiB) and decreases on cohesityvsi01 (-119 TiB). Starting a week after the upgrade, cohesityhct01 had been reporting as an 8 or 9-node cluster until this week where it is reporting as a 10-node cluster again. Data Domain utilization has also increased by 224 TiB this week, getting great data reduction and increasing overall data reduction on the arrays. Memory utilization in the VMware cluster stg-prod-hwf-westcld01 has jumped from 39% to 69% this week, with one host up to 93% memory utilization. This cluster should be reviewed, and action taken as needed. For additional information, please [login](#) to your portal or see below for details. Have a great week!

Weekly Observations

- 27.1 PB Usable (20.5 PB Raw) 20 arrays
 - 55.2% Used
 - 59.5% Allocated
 - 2.5 TB Orphaned
 - 4 arrays with red light alerts this week
 - 4 arrays with Hard Quota Threshold Exceeded
 - 2 arrays with 1 Failed Drives
 - 1 array with Number of Quotas Exceeding HARD Limit Thresholds
 - Pool/data store alerts
 - 10 data stores flagged for being over 80% Used
 - 2 data stores over 100% allocated and over 80% Used - review these pools first and expand as needed
 - vsi-pure-pjcm01-05
 - NW-VCTS-SIVT-02
 - No pools over 100% allocated
 - 2 data stores over 100% allocated
- Virtual/VMware Summary
 - 92 clusters, 514 Physical Hosts, 27371 VMs
 - 585 Data stores (+12)
 - Avg Resource Utilization
 - CPU 26.1%
 - Memory 34.8%
 - Disk 26.5%

Cohesityhct01 – Utilization trend since the upgrade in June

Application Performance Trend

Storage Summary
