

Comparing Visual One Intelligence™ & VMware vRealize Operations Manager (vROps)

vROps is a great tool for skilled VMware admins and architects. However, its depth and complexity make it impractical for broader teams who need visibility and optimization with less time and less effort. Moreover, the uncertainty surrounding Broadcom's acquisition of VMware is causing hesitation among teams concerned about becoming too dependent on VMware. Besides concerns about increasing costs, relying on vROps for virtualization visibility means that any virtual workloads placed outside of VMware would require yet another monitoring tool.

Visual One Intelligence™ provides robust yet simplified multi-vendor compute, storage, and cloud reporting that is compatible across VMware, Nutanix & beyond and:

1. is simpler to use than vROps;
2. correlates seamlessly with the rest of your infrastructure;
3. optimizes your costs, asset ROI, and migration efforts;
4. promotes operational continuity;
5. uses a single frictionless pricing model.

SELECTED FEATURE COMPARISON

	 vROps	 Visual One Intelligence
SIMPLICITY		
Ability to custom-build reports	✓	✗
Reports are pre-built and ready to use	✗	✓
Executive-level dashboards	✗	✓
Automated weekly behavioral analysis emails	✗	✓
OPTIMIZATION		
Automate performance optimization actions	✓	✗
Numeric capacity scores evaluating workload efficiency	✗	✓
Workload right-sizing recommendations	✓	✓
Dollar-value metrics analyzing cost and waste	✓	✓
Cost-modeling across platforms	✗	✓
Interactive capacity forecasting and modeling	✗	✓

Virtualization Reporting

SELECTED FEATURE COMPARISON

	 vROps	 Visual One Intelligence
OBSERVABILITY		
Realtime data monitoring	✓	✗
Multi-vendor cloud compatibility (including AWS, Azure)	✓	✓
Cross-platform reporting (ex: Nutanix, Dell EMC, HPE, IBM)	✗	✓
Comprehensive cluster analysis on a single pane of glass	✗	✓
ServiceNow Integration	✗	✓
CONTINUITY		
Alerts for VMware misconfigurations	✓	✓
Weekly personalized email identifying changes in workload trends, capacity threshold warnings, alerts, misconfigurations, and remediation recommendations	✗	✓
DRS disablement alerts / notification for clusters unable to support N-1	✗	✓
PRICING		
Free for some VMware customers	✓	✗
One standard, flat-rate unit price regardless of utilization	✗	✓
No need to manage licenses	✗	✓
